TEACHING

Advanced Swine Nutrition, ASI 902: 1994 to present . I have helped develop and teach this graduate level course to train students in computerized diet formulation and discuss current concepts and practices in applied swine nutrition - approximately 10 students every third fall semester. In addition I have guest lectured in ASI 318 (Fund Nutr) ASI 320 (Prin Feed), ASI 535 (Swine Sci). ASI 921 (Prot Util Dom Anim), and provided lectures for Junior and Senior Veterinary students at KSU, CSU, and U of MN Colleges of Veterinary Medicine.

I have also developed in-depth nutritional education programs for IFAMS veterinary students and veterinarians, extension specialists, and feed industry personnel on a short-course basis. Other teaching activity includes presentations at numerous meetings for nutritionists, veterinarians, feed

industry members, Humane Society personnel, swine producers, and 4-H and FFA members. I have hosted visiting professors, veterinarians, students, and swine producers from several countries including: Argentina, Australia, Brazil, Canada, Chile, China, Columbia, Honduras, Costa Rica, England, France, Germany, Guatemala, Ireland, Italy, Japan, Mexico, Paraguay, Poland, and USSR. I also have coached or assisted with 4-H, FFA and collegiate meats and livestock judging teams.

UNIVERSITY OF MINNESOTA, 1988-1991, Graduate Research Assistant.

Doctoral dissertation: *Influence of blood metabolites and metabolic hormones on milk production and reproduction in the sow*. This research centered on making the connection among diet, milk production and reproduction via the blood metabolites, metabolic hormones and reproductive hormones. I co-authored the two NPPC grants obtained to partially fund this project.

Other research included:

- 1) Determining the appropriate fat level for nursery pig diets.
- 2) Evaluating the effect of adding milk products and/or fat to starter pig diets on subsequent performance during the grower and finisher phase.
- 3) Examining the influence of a tyrosine dose to postweaning sows on litter size.
- 4) Assessing the acceptability of diets containing lupin meal.

KANSAS STATE UNIVERSITY, 1986-1988, Graduate Research Assistant.

Master's thesis: *The effects of the carbohydrate and protein fractions of milk products on starter pig performance*. Growth and digestibility trials were conducted to evaluate the importance of the carbohydrate and/or protein fractions of milk products on the response elicited when milk products are added to starter pig diets.

NORTH DAKOTA STATE UNIVERSITY, 1982-1986, Beef Barn Employee and Assistant Judging Team Coach. Involved in the everyday operation of the beef unit including the collection and recording of experimental data. I also served as assistant coach of the meats and livestock judging teams.

TOKACH ANGUS RANCH, 1974-1986, Farm Laborer to Management Team.

Through the years, I evolved from a farm laborer to an integral part of the management team for our family-owned diversified livestock farm. The major enterprises on the 5,000 acre grain and stock farm included a 300 head purebred angus cow herd, 80 sow farrow-to-finish unit and small grains operation.
