Gain Test Period was 82 Days (November 3, 2017 - January 24, 2017)

Feed Intake was measured for 35 days (BIF decoupled guidelines; December 24, 2017 - January 28, 2018)

Feed Conversion Ratio Calculated as Avg Daily Feed Intake/Avg. Daily Gain

Feed Conversion Ratio Ratio computed as (Feeding Group Avg FCR/Animal FCR)*100; **Animals with Ratios >100 are more favorable for FCR**

NA Animals were removed from gain and/or feed intake test due to illness or failure to consume feed from intake system.
