Livestock Mortality Management Workshop

November 30, 2026 at 12:30 pm

Ag Research Center – 1232 240th Ave, Hays, KS 67601

Practical • Affordable Farm-ready

Learn livestock mortality management techniques that use on-farm resources while helping to protect water quality.

- Learn about livestock mortality management regulations and requirements ☑
- See a shallow burial site demonstration using local carbon sources ☑
- Discuss water quality considerations and site preparation ☑
- Gain practical, low-cost solutions that can be implemented with resources already available on many farms and ranches ☑
- Participate in a question-and-answer session with specialists ☑

Workshop format:

Join us for a hands-on workshop focused on livestock carcass disposal methods that help protect local water resources. The program includes classroom presentations followed by an outdoor demonstration and site visit.
